

Best Practice Sheet - Removing Asparagus Fern with 2-Prong Hoe

Half the Work – Double the Results

Cyclone 2-Prong Hoe

Long handle - reduced back strain
Good balance & weight for minimum work effort
Forged (not cast) for strength
Sharp strong prongs penetrate hard rocky ground.
Paint bright colour to highlight safe use

***Asparagus aethiopicus* - Asparagus Fern (picture) and *Asparagus plumosus* - Climbing Asparagus Fern**

Use prongs of 2-Prong Hoe to get under and beside crown of plant and lift out with most nodules intact. To reduce risk of re-infection have a large tub/bucket beside plant. Bag and remove whole plant from site.
